

UPS My Choice[®] for business:

Take control and save time with new tracking dashboards designed just for you.

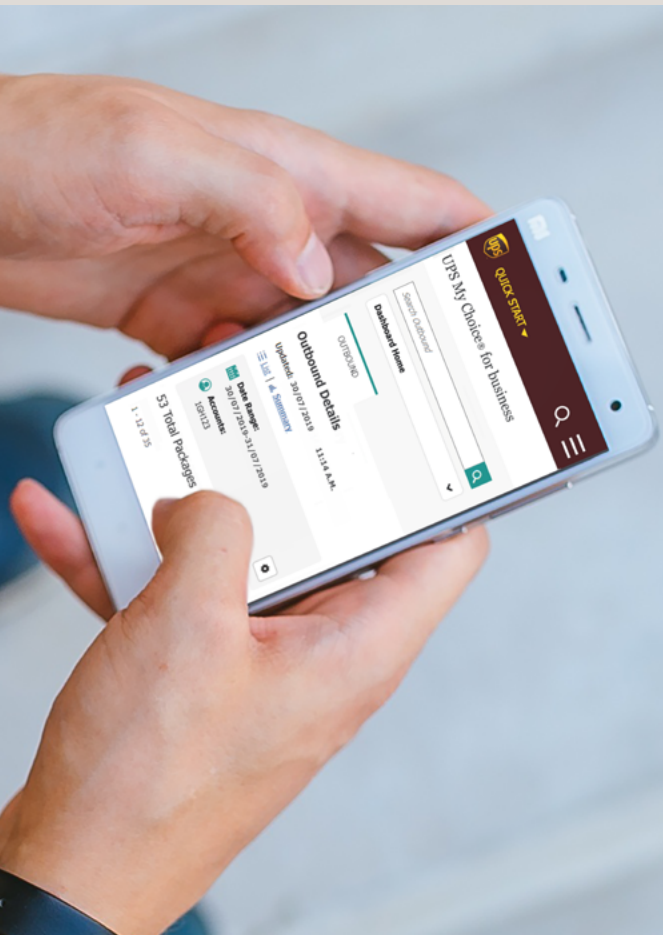

With the day-to-day demands of running your business, manually tracking individual deliveries and dealing with customer shipment questions can eat into valuable time. But all that changes with **UPS My Choice[®] for business**. Sign up to track shipments quickly, view all inbound and outbound packages at a glance, make delivery changes, and improve customer service along the way.

Key Features:

- Self-managed access to free inbound and/or outbound visibility dashboards
- Estimated delivery windows and inbound delivery notifications, including pre-arrival delivery alerts
- Easy online registration, with the ability to add additional users
- Delivery change options, such as re-routing, changing delivery date and return to sender

What is UPS My Choice® for business?

UPS My Choice for business was created with your business in mind. With access to an inbound dashboard, outbound dashboard or both, this free tracking tool makes it easy to view and manage all your shipments like a pro. Delivery notifications, estimated delivery windows and delivery change options for inbound shipments help you plan better and save time and money. [Signing up](#) online is easy, and self-administration allows you to add additional users in your organization.

Take control.

Keeping track of your outbound shipments has never been easier. With a quick glance at your outbound dashboard, you can find the exact status and location of all shipments on the way to customers. UPS My Choice for business can help you improve customer service by providing more accurate delivery timelines, and allowing you to proactively monitor shipment status *before* customers start calling.

Be ready.

Inbound delivery notifications and estimated delivery windows let you know what's coming the day before the delivery, and even when a delivery is nearby, which helps keep you updated to avoid missed deliveries. Your inbound dashboard helps you prepare your employees to receive the supplies you need for your business. With a better picture of your incoming inventory, you can also avoid the costs of keeping extra stock on-hand. And with delivery change options, you can enable last minute changes to a delivery, re-route to a different delivery address*, or move a delivery to a future date.

*Some fees may apply.

Sign up online.

UPS My Choice for business registration is simple, and you can sign up in just a few minutes on [ups.com](#). Once you're in, the administration portal makes it easy to share visibility privileges with multiple users in your business, and customize different access levels based on job responsibility.
